DecoSatin™ DA012

New DecoSatin wide-format printable fabric product.

What is DecoSatin DA012?

DecoSatin DA012 is a white woven polyester textile coated with a clear, repositionable removable acrylic pressure-sensitive adhesive. Designed specifically for wide-format imaging, the satin fabric prints well to produce vibrant graphics.

DecoSatin DA012 is intended for wide-format printing of pressure sensitive wall graphics, wall murals and custom wall coverings in locations ranging from hotels, conference centers and reception areas to stores and waiting areas. It requires no paste to install, minimizing prep and cleanup. DecoSatin is also designed to be easily removed from most latex-painted walls that are in good condition and does not require use of a wallpaper “claw” or steam.

Benefits

- Real woven fabric is topcoated for vibrant graphics
- The repositionable removable adhesive is easy to install, saving labor time.
- Unlike many wallcoverings, DecoSatin is removable without the use of steam, wallpaper remover or wallpaper “claws”. Just peel DecoSatin slowly and the wall is ready to prep for the next installation.
- DecoSatin meets the flame spread and smoke density requirements for ANSI/NFPA – Class A and IBC – Class A.
- DecoSatin is available in 54" x 150', 3" core roll.

Product	Gauge	Adhesive	Liner	Min App	Outdoor Durability
DecoSatin DA012	8 mils	Repositionable Removable	86# Polycoated Kraft	50°F (+10°C)	Up to one year

The user is responsible for determining the product’s suitability (including removability) for the user’s application.
