

PERMACOLOR® Mounting Films Product Guide

Rely on Versatile Mounting Films for Everything from Face-Mounted Fine Art to Back-Mounted POP Displays

MACtac® TAKES YOU THERE.

Benefit from Unparalleled PERMACOLOR® Quality

When it has to be right, it better be PERMACOLOR.

Proven superior adhesion and flawless results in the graphic products market for years, the PERMACOLOR product line continues to deliver additional high-quality, optically clear and cost-effective mounting films options. No matter what your mounting needs, MACtac® has you covered.

Optically Clear Mounting Films

PermaTrans® IP2100: The best optically clear mounting film on the market, PermaTrans IP2100 is composed of only the most optically clear carrier, acrylic adhesive and liners for premium point of purchase, backlit and fine art mounting.

ColorTrans™ CT2100: Designed for face-mounting applications, ColorTrans CT2100 is an optically clear permanent adhesive and carrier at an attractive price.

NEW! ColorTrans CT2200: Ideal for removable graphic applications on glass and acrylic sheeting, ColorTrans CT2200 is an optically clear mounting film with permanent adhesive on one side of the carrier and removable adhesive on the other.

High Performance Mounting Films

PermaPrint® IP2000: An unsupported film of acrylic pressure-sensitive material, PermaPrint IP2000 permits distortion-free mounting to a wide variety of substrates. Its construction includes a second liner of transparent plastic film which permits total inspection of the product before final bonding and allows the mounted graphic to be wound in roll form—without channeling—for shipping or storage.

PermaPrint IP5000: A white polypropylene film coated on both sides with an acrylic pressure-sensitive adhesive, PermaPrint IP5000 is protected with a single moisture-stable, polycoated kraft liner. PermaPrint IP5000 is designed to provide opacity and quick adhesion to a variety of mounting surfaces and can be used in both indoor and outdoor applications.

Intermediate and Economy Mounting Films

ColorPrint® PP2011: An intermediately priced mounting product with medium tack, medium peel adhesion

PERMACOLOR®

and high cohesive strength for quick adhesion to a variety of mounting surfaces, ColorPrint PP2011 features a clear polyester carrier coated on both sides with an acrylic pressure-sensitive adhesive protected by a white, moisture-stable paper liner.

ColorPrint PP2013: Intended for general purpose mounting on a wide variety of substrates, ColorPrint PP2013 is a moderately aggressive rubber-based adhesive coated on both sides of a clear polyester carrier.

NEW! ColorPrint PP2018: An economical mounting product with good tack and peel adhesion and high cohesive strength, ColorPrint PP2018 is composed of a clear polyester carrier coated on both sides with an acrylic pressure-sensitive adhesive protected by a white, moisture-stable paper liner.
