## Product Guide

Designed for superior traction and exceptional durability.

### What is Colorgard Floor?

Designed to offer excellent protection of printed graphic images, Colorgard Floor PF6600 is a heavily textured overlamine that offers superior pedestrian **traction** and exceptional **durability**. Ideal for both indoor and outdoor settings, Colorgard Floor was developed for medium- to long-term indoor or short-term outdoor floor graphic applications.

Additional features include:

- 6.0 mil clear textured matte PVC
- High-tack adhesive compatible with all digital ink jet and UV inks
- High traction matte finish that is also designed to help eliminate glare
- Protection from abrasion and moisture and reduced color fade caused by UV light
- Can be paired with Gruv , Rebel® , Streetrap® or any other floor media

With very few industry floor graphics materials certified to date, Mactac®, the leading pressure-sensitive overlamine provider, has diligently taken action to manufacture and test Colorgard Floor products specifically to the **new ANSI/NFSI B101.3 standard**.

In addition to meeting the new U.S. high traction specifications for floor safety, PF6600 also meets German National Standard test methods commonly used in Europe, such as DIN 51130. While different, the ANSI/NFSI B101.3 and German National Standard testing platforms are known to correlate well with one another.

Product Code	Face	Adhesive	Liner	Width	Durability	Slip Resistance	Floor Applications							Floor Media			
							Indoor	Outdoor	Digital Images	POP	Posters	Tradeshows Graphics	High Traffic	Gruv 400 & 500	Rebel 500	Rebel 200	Streetrap STR328
PF6600	Textured Vinyl	Clear Acrylic	78# WK	54"		Indoor & Outdoor ANSI/NFSI B101.3, Wet or Dry Conditions~	■	■	■	■	■	■	■	■	■	■	■

ASTM C-1028 Test method formerly withdrawn. No new safety specifications for dry floors has been approved by recognized laboratories.  
~ See Performance Guides for more details on product slip resistance.
