DesignScape3D

DesignScape3D™ Download and Installation for iPad

Visit the Apple App Store and search **Mactac** for the app.
Click the download button to download the app to your iPad.
Open the email containing your username and password to sign into your app.

*If you haven't already registered, click the link below the login button to register for the app.

DesignScape3D's detailed content will begin to download, and you'll see a status bar in the lower right corner. When the status bar disappears, DesignScape3D is ready to use.

If you have any questions, please contact designscape3d@mactac.com.

Installation tips:

It's always best to have a good wireless connection at home or in the office, and plug in the device before downloading. The app may not download over cellular or may start and fail. The app will show up in your Purchased app list and can be re-downloaded when the device has a good connection and is plugged in or fully charged.

If you forgot your user name or password, click forgot password under the login to assign a new password.
