Floors
Product Guide

Short-term graphic film designed for textured concrete and asphalt surfaces - also select rough wall surfaces both indoors and outdoors.

What is Streetrap?

Streetrap® is an easy-to-print 4.0 mil matte white vinyl that delivers superb color reproduction, durability and ease of application. It is engineered with an aggressive solvent acrylic adhesive that provides outstanding adhesion to unsealed pedestrian concrete or asphalt surfaces, and select rough wall surfaces.

Where does Streetrap Perform?

Almost anywhere there is pedestrian traffic, delivering powerful promotional messages – where other materials fear to tread. Typical applications include:

- Retail Stores
- Parades
- Private Business
- Schools
- Trade Shows
- Entertainment Venues
- Fairs
- Sports Arenas
- Plant Safety Messages
- Convention Centers
- Public Buildings
- Marathons

It can also be used for stunning wall graphics on painted or unpainted cinder block walls, unsealed cement walls or pillars* and poured concrete support pylons.

Streetrap when laminated with PF6600, meets and exceeds current wet slip resistance specifications as conducted by the National Floor Safety Institute (NFSI):

NFSI HIGH-TRACTION

ANSI/NFSI B101.3 Wet Dynamic coefficient of Friction: Streetrap & PF6600 **.48** Min. Spec. **.42**

Streetrap used as an exterior floor graphic must be laminated with PF6600, a 6.0 mil textured PVC overlaminating film which exceeds ANSI/NFSI B101.3 and B101.1 specifications for a "High Traction" surface. **Download a Performance Guide at mactac.com for detailed information.**
