

Walls, Signage & Decals

Product Guide

The Oodle[™] products are easy to handle for easy application.

Walls, Signage & Decals

Product Guide

What are Wallnoodle®, Roodle® and Permanoodle™?

These are easy to handle multi-printing media from Mactac® offer excellent printing performance and ease of application. All products are wide-format solvent, UV, and latex printable, as well as screen and offset printable, and their thick vinyl face means that they are easily handled during installation, with or without an overlaminate.

- **Wallnoodle** is the original repositionable, removable poster stock for indoor applications including posters, signage and POP graphics. A ¼ to ½ inch border is recommended for solvent and UV-printed graphics, and no border is necessary for latex and offset printing.
- **Roodle** printable media features a removable adhesive ideal for tiled wall murals, indoor and outdoor signage, bumper stickers and graphics. Roodle is designed for removable graphics printed to the edge.
- **Permanoodle** is the newest of the 6.0 mil products and features a permanent acrylic adhesive for lasting POP graphics, signage, wall graphics and decals.

Roodle and Permanoodle can be overlaminated to protect and enhance the printed graphic, though an overlaminate is not necessary for simple handling during installation. Due to the low tack repositionable microsphere adhesive used, overlaminating is not recommended for Wallnoodle.

Wallnoodle, Roodle and Permanoodle meet ANSI Class A, NFPA Class A and ICB Class 1 for flame spread and smoke density, tested under ASTM E-84 as well as latest compliance requirements with UL 10b and 10c certification.

Roodle and Wallnoodle are phthalate free and meet REACH and RoHS compliance. They are suitable for children's stickers and kids meal inserts.
