MACjet®

Ideal for Both Dye and Pigment Ink Jet Printers

Roll Label

PSA-coated papers and films in roll-to-roll form. Extensive product options, available customization, varying roll lengths and widths, and customer friendly services, like our Mactac Precise℠ Program, which offers next-day shipping on a precise amount of material needed for small runs and limited applications.

Mactac's expanding line of MACjet® products provide the options you need for all of your on-demand ink jet printing applications. From adhesive to facestock to liner, our products address the needs of your growing digital markets. Whether you require a BS5609 certified drum labelstock or a work- horse semi-gloss or polypropylene, Mactac® has the product for you. MACjet products are smudge resistant, with very good water fast properties and are engineered to print with dye and most pigment based inks. Compatible with today's most popular OEM printers such as Colordyne, Epson, Neuralabel and Primera.
