

**DO NOT  
REMOVE**

# Destructible Labelstocks

## Features

- Labels easily chip and tear apart upon attempted removal
- Provides a clear indication when fraudulent tampering is attempted and prevents the reuse or reapplication of labels
- High initial tack and good adhesion to high and low energy substrates and textured surfaces
- Various film face stock options that are flexo and thermal transfer printable

## Potential Applications

- Warranty, asset tracking and automotive VIN labels
- Industrial and electronic device packaging identification
- Security seals to prevent tampering, theft or counterfeiting

## LTCNVP50

- Unique balance of high tensile strength with low internal strength – making it easy to convert on press but incredibly hard to remove once applied
- Fast conversion speed and reliable waste removal on press
- Non-Vinyl = better environmental performance

**SEE FOR YOURSELF!**

**TRY to remove the sample label of LTCNVP50 on the front.**
