

*Widely Accepted  
Recyclable Plastic  
Container Labels*

**Learn More**

Labels and adhesives can significantly impact the recyclability of plastics. Mactac® has been granted Critical Guidance Recognition (CGR) from the Association of Plastic Recyclers (APR), exceeding the association's strictest criteria for product packaging recyclability for PET, HDPE, PP plastics and PE Flexible

## Widely Accepted Recyclable Plastic Container Labels

**PET Plastic** - Labels need to float off PET containers during the washing process for recycling - leaving no adhesive residue behind.

**HDPE, PP and PE Flexible Plastic** - Labels need to remain in place during recycling without impacting the physical properties of the recycled HDPE, PP and PE Flexible pellets for pigmented applications.

Common labeling applications include:

- Bottles
- Clamshells
- Health & Beauty Products
- Food & Beverage Packaging
- Household Goods
